Vscan Air™

Vscan Air is the wireless handheld ultrasound that **enables whole-body scanning** and **delivers crystal clear images** so you can make informed decisions, faster.

Take your handheld ultrasound experience one step further. Vscan Air + Digital Tools connects you to a suite of user-centric digital tools through two optional subscriptions.

Fleet solutions

Efficiently manage your fleet of Vscan Air™ devices

MyDeviceHub

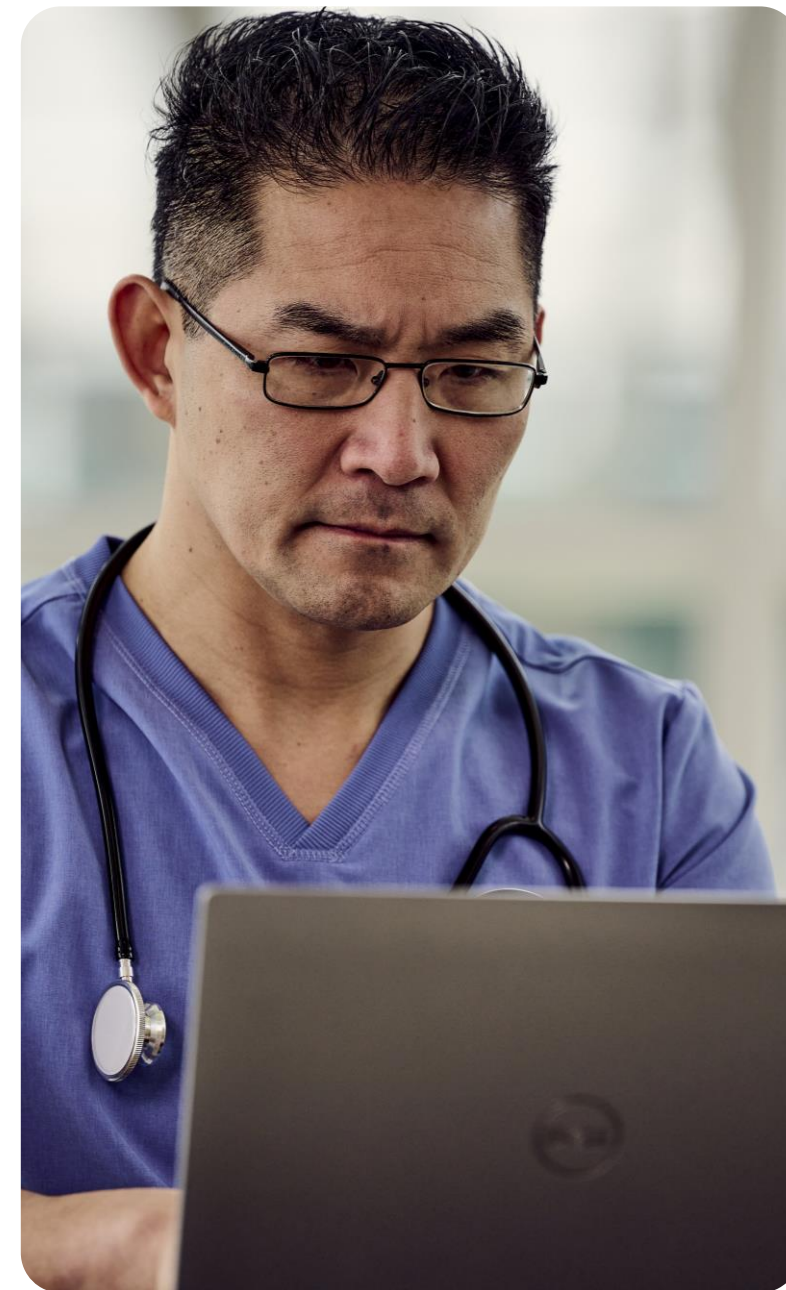

Remotely manage and control your fleet of Vscan Air devices.

MyRemoteShare¹

Securely connect with colleagues and educators in real-time with audio, video, and screen share capabilities.

1. The quality of the ultrasound image visible to the remote participant is dependent on the network connection and display device used by the participant and cannot be validated. MyRemoteShare is therefore not intended for diagnostic purposes.

Individual solutions

Improve security, image management and collaboration

Verisound™ Gallery¹

Manages the storage and sharing of your handheld ultrasound images with end-to-end encryption, supporting HIPAA-compliant, cloud-based PACS workflows. Focus on care, not compliance.

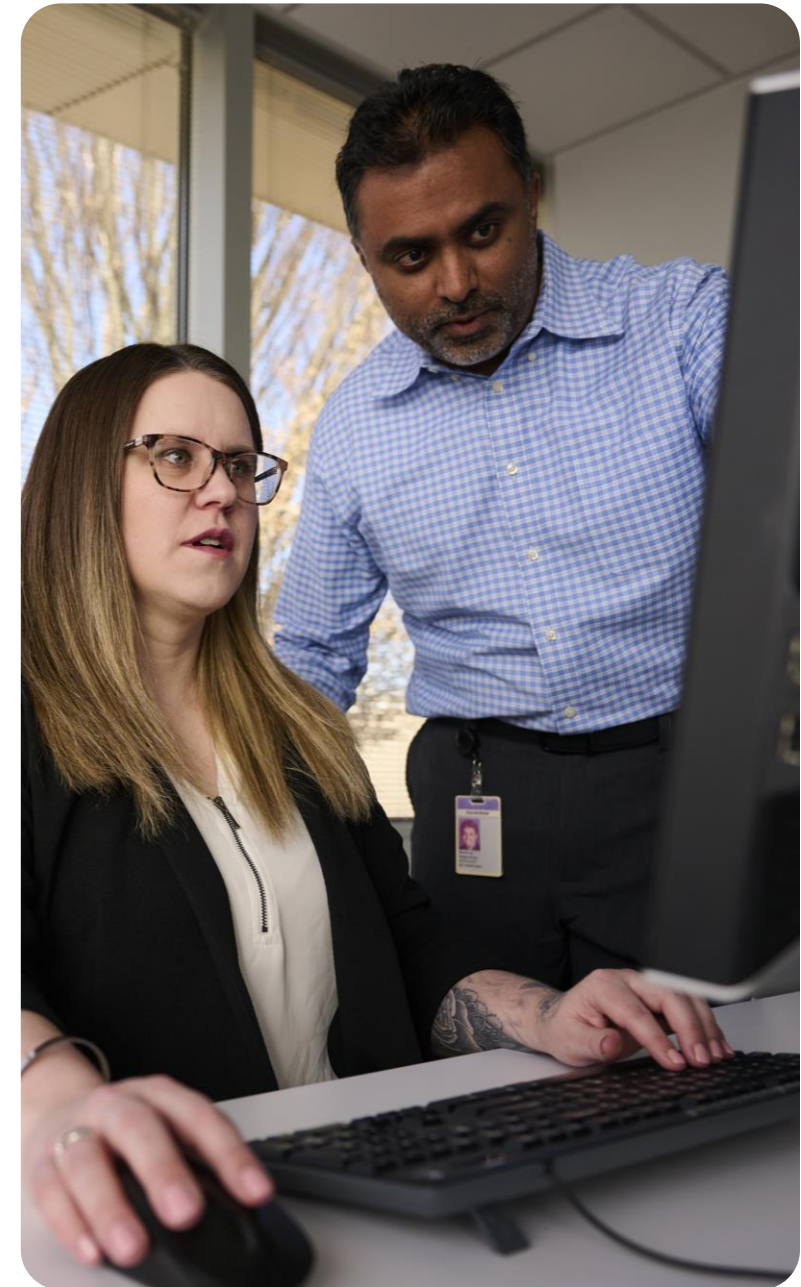

MyRemoteShare²

Securely connect with colleagues and educators in real-time with audio, video, and screen share capabilities.

Verisound Gallery is not for diagnostic use.

1. Works with Centricity™ Universal Viewer Zero Footprint.

2. The quality of the ultrasound image visible to the remote participant is dependent on the network connection and display device used by the participant and cannot be validated. MyRemoteShare is therefore not intended for diagnostic purposes.

MyDeviceHub

Remotely manage and control your fleet of Vscan Air™ devices

- Register and manage all Vscan Air devices from one centralized, web-based portal
- Seamlessly group devices into fleets and assign probes to specific departments
- Use existing enterprise credentials for secure and simplified access to Vscan Air with Enterprise SSO support
- Set up DICOM® destinations per fleet
- Restrict usage of probes in a fleet to named users
- View usage logs

DICOM is a trademark of the National Electrical Manufacturers Association for its standards publications relating to digital communications of medical information.

MyRemoteShare

Securely connect with colleagues and educators in real-time with audio, video, and screen share capabilities

- Simply start a remote share session from the Vscan Air™ app for training and support
- Easily and securely share Vscan Air app screen
- Broadcast Vscan Air app screen remotely
- Run ultrasound labs — from anywhere
- Train users

Verisound™ Gallery

Anywhere image access.

Securely manage, store and share exams.

- Easily upload exams to the cloud from the Vscan Air™ app with this secure cloud-based PACS data and image storage and review solutions that supports DICOMweb™ export
- Share studies for training, education, and consultations
- Access images and data from anywhere
- Eliminate the need to hold data on mobile device to minimize data privacy risks

Verisound Gallery is not for diagnostic use.
